Chapter 3 Continuation

Hachidori-hime was a clever, popular girl. When she used her mysterious watering can, the stillen rice fields became lively like they were before.
A long long time ago There lived a cute princess named Hachidori-hime
Tell me!
What's on the other side of the sky?
The fields and the sky are really gloomy. What should we do?
How do we make both the land and the sky wet again?
Then one day, a girl asked:
Hey, Clone !
Yes, Escha ?
Even though they were able to make the land wet, even Hachidori-hime didn't know how to heal the sky
And so it was decided, that Hachidori-hime would see out on a mission.
More than anything, she wished for a book, that would teach her about the distant skies

On the twilight sky
lies the reachable dreams
of the Alchemist

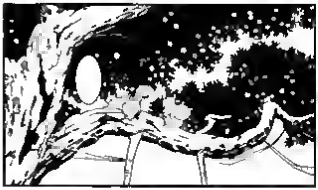
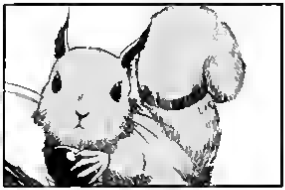
This winds insane!
Hold on tight!
It's the swirls around this place! There's strong turbulence here!
The propeller! Can it stand this wind?? It's three generations old!
Is that—
This is the Pilot's chance to show his talent!
We might still be able to escape and reach Corseit!

Black..
Clouds?!
That's
According to the data,
The unexplored ruins of Corseit?!

What the hell is on the other side!?





Ah!
There we go! That doesn't look so bad!
Hmm
Ah!
I thought we'd try a new hat today.
Now where's that one on the shelf..
WOW! How nostal-gic!
How long has it been since I made you read this to me..

When did I think that I wanted to go to the other side of the sky?
Like Hachidori -kume...
.....
Hmmm...
Ea-chaaaaa!
yea?
If you don't hurry you'll be late for work.
WAAA!! ??

Escha, You're always trying too hard, will you really be all right?
I'm fine! I decided to do this myself!
After all,
Isn't your role really important?

This Rural town, Corseit Apple Park, was where I was born and brought up.
Well then, I'm off.
Clone!
Are you really okay Escha? I never thought that you would become an official....
My my
When I was young
I learned alchemy from my mother. You could call it a special ability.
My name is Escha Mahen

Back in those days, even more so than now, Science was developing. Back when the skies were blue when studying and developing one's skills was important
Even though I learned Alchemy from my mother,
Even now, it seems as though research and studying still thrives
Hey Escha! Thanks for the Medicine!
My back feels great!
It really did the trick!
Escha-chan, thanks for everything.
Escha!
Isn't it your first day at work?
I love this town.

I try to be as helpful as I can to everyone.
But either way, it's been decided. Today is my first day as a government official!
Wait..
さわ
さわ
Didn't we receive permission from the Branch Head?
It was supposed to reach us today! What do you mean it hasn't?!
I'm sorry! We had trouble with the strong winds. The goods were stopped in a neighboring town...

Good Morning, Marion-san!
Welcome to the Development Corps!
You're not just a "help" anymore!
You're officially a member now!
Even though I'm still an office personnel, I'll be busily leading the team!
Yeah
Esshe-chan!
People can hear us from the hallway What do you have to tell me?
Even though the two of you are finally here, the equipment still hasn't arrived.
Two of us?
Hehe...
It's not just you coming today
There's one more Alchemist!
!

Alchemy from the City Center is state of the art!
Compared to the rural side, the equipment is quite different. You'll have to study hard!
I thought that from the start, Marion-san.
I'm well acquainted with Alchemy!
The person that you worked with before me was also an Alchemist.
I'm leaving this assignment to you two new alchemists.
There's also that
Of course they applied too, but I didn't think that they'd come all the way from the city center.

Other than my mother, this was the first time I'd met another alchemist. I was extremely nervous.
What'll they be like?
The Alchemy from the city.
Sir, I've brought Escha.
Even so...
Geez... The wind is too strong!
Kyaa!

Where's the other Alchemist?
Good. We all seem to be here.

Looks like it's about to start!
I'm fine! You start today as an official, so work hard!
Okay!
You're working hard!
Onii-chan!

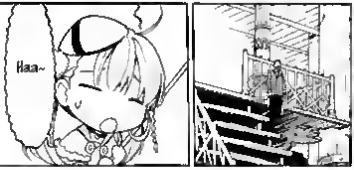
Well then, shall we begin?
Thank you for coming all the way here, Logix-kun.

My name is Logix Fiscario
I'm still not sure of my way around here,
but I look forward to working with you.
Eucha
Come on, introduce yourself
Y-
Yes!
A guy?
.....
U-U-Um...
ペコッ
I'm Eucha Mallet!
I'm an Alchemist and, um, I look forward to working with you!

Yep!
I studied by myself, so there's a lot I still don't know... so please teach me sometime!
You're ...
Also an alchemist...

I'm not a tool to help you learn.
No

For this town, for the investigation of untouched ruins, travel and expand your search as far as you can, and over as many places possible!
From today on, we request that you bring fruitful results from your expeditions.
From today on, both of you are part of the Development Survey Department Cursor Branch's New Government Officials.



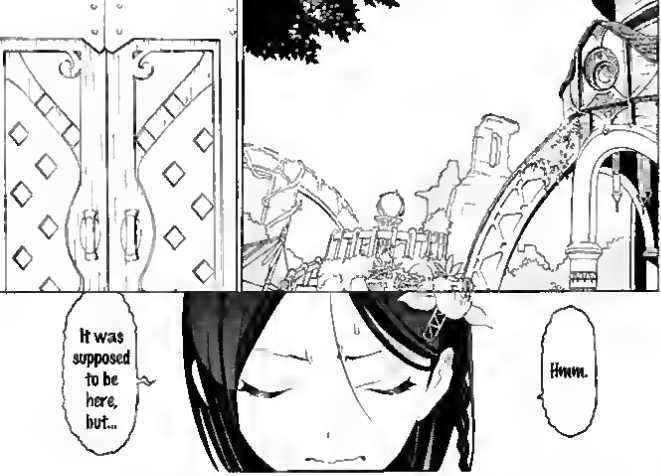
Haaa~

What was that? "We place our hopes in your works"?
Hmph

Researching these untouched ruins is Corseit Branch's, and this town's, wish and desire.
We place our hopes in your works!

That old Raccoon!
If you put your hopes in them, the cost! The number of staff! At least tell us what it'll increase!
But...

As of today, you're the development corps' new recruits!
And you're both alche mists!!
Now they can't say Scrap the Develop-ment Corps anymore!!
Mari on-san.. It hurts..
Lets start working right away~~!!
Lets work hard together.
Esha-chan~~



It was supposed to be here, but...
Hmm.

So this is the new workshop!!
Wow ~
Amazing!! It's amazingly big!!

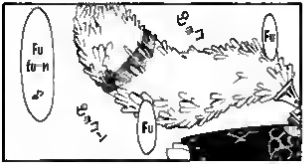
Sorry. It was supposed to be here today.
But the Alchemy equipment still hasn't arrived.
.....
...It's so vast?!
This is Alchemy... We can't do our work like this!
Eeeeeh?

Yeah, we can't exactly fool around..
What are we supposed to do until tomorrow..!?

By the way where are the Division Leader and Other Members?
Hmm.. maybe the two of you could go outside of town
And collect some ingredients for your Alchemy...

Well, there is one other skilled swordsman.
But they're out on a mission right now, so it's just us 3 in Corseit.
.....
ポソ
The City Center really is different..

Sorry I'm being to noisy aren't I?
It's just that we get to work as of tomorrow..so I'm kinda happy..



Fu fu-n
Fu
Fu
Fu

Ah!

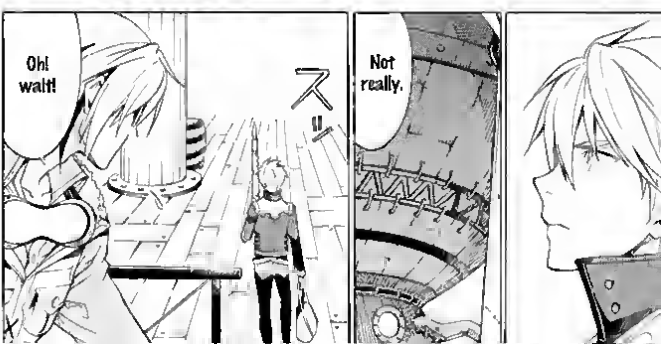
My job makes me happy too..
Even though it's work?

My mother was the one who taught me Alchemy
So also for her, at my age, I want to work for everyone's sake here.
Being able to help the people of this town. . of Corseit, makes me happy

Let's work hard tomorrow.
See you later, Logik-san.
.....
For that reason...

Using Alchemy for the people's sake, huh?
You've never been here up till today...
You say that
It flew in this morning's wind turbulence.

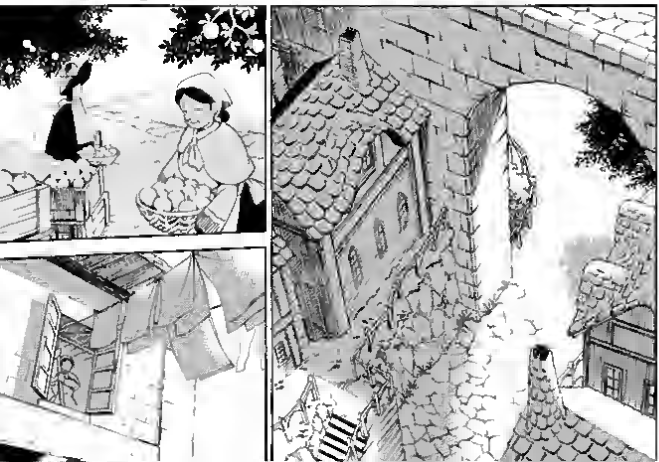
It might be that you heard it from the pilots, but -
When you took one glance, you knew exactly the propeller model number didn't you?
You like hot air balloons too?
I'm a mechanic for the hot air balloons in Corselt. Escha and I are close cousins.
I'm Awin.
.....?

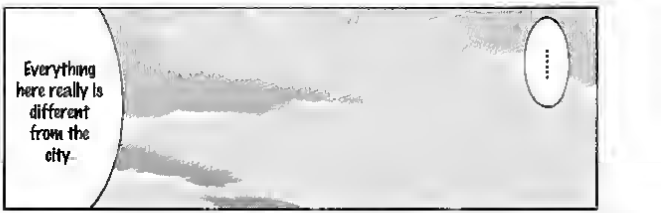


Oh! wait!
Not really.

Awin!
Stop messing around! We've got work to do!

For a long journey especially from the capital
His luggage is awfully small...





Everything here really is different from the city...
.....

For now, the prospect of a resolution to the Development Corps personnel shortage stands. The rest is dependent upon Marion-kun.
...Hmph

Logix Fiscario.
He doesn't have a place to return to.
It would be good if he could do well here in Corseit..
Logix-san seems like a nice person.
I hope I can get along well with him at work.

I wonder, have people from the city eaten Corsuit apples before?
.....
I'm home, Clone!
Welcome back!

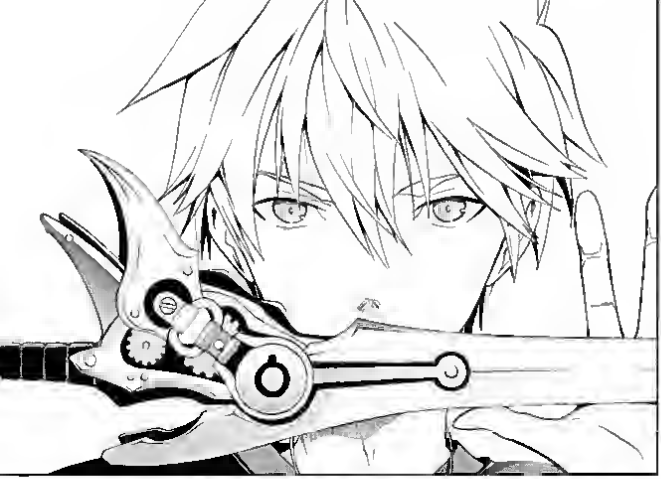
So, Clone
The Alchemy pot hasn't arrived in the the office yet, so we can't do any alchemy. So starting tomorrow we'll be going to collect materials.
Hey, are you listening?

It's fine. It's just forests in the surrounding areas.
And Owl-chan will be accompanying me too

Are you going outside the city?

My my that's
Quite dangerous isn't it?

That bring back memories!
Wow!
Eseha, is it all right if I stay up?
Clone! The Sequel to this picture book...
I should show Clone next time, maybe she can find the sequel.
I don't remember.
That story
I can't remember how it continues, "Hachidori-hime on the other side of the Sky."



ヒュオ
ガタ
ガタ
The wind has picked up.

バキ
バキ
This method of cooking is a disgrace to Marion-san.
Oh well, I've got no other choice.
Hm hm?
That's...
The scent of a demon?
バキ

STEALTH SYMPHONY CHAPTER 1

I DON'T REALLY THINK THAT'S TRUE.
SOMEONE ONCE SAID, "IT DOESN'T MATTER HOW YOU LOOK ON THE OUTSIDE IT'S WHAT'S ON THE INSIDE THAT COUNTS."
